- **Guest User**
  1. Items
     - Select
     - Select...where
  2. Orders
     - Select
     - Insert
  3. Profile
     - Insert (register)

OUTLINE OF CONTENTS

******* PROJECT FOLDER *******

A. **Project Main**
- index.php
  - Stores user session
- register.php
  - INSERT INTO users
  - Uses post method
  - Password gets hashed
  - Checks verification for:
    - empty/null fields
    - an existing email
    - password mismatch
- login.php
  - SELECT…WHERE administrators
  - SELECT…WHERE users
  - Uses post method
  - Activates user/admin session
  - Compares input to hash password
  - Checks verification for:
    - empty/null fields
    - nonexistent email
    - password mismatch
- logout.php
  - destroys the active user session
- main.css
  - style sheet
  1. Inc
  - db_connect.php
    - Connects to database
      - Try/catch statement
  - error.php
    - Displays when verification fails

******* USER TYPE: ADMIN *******

B. **Admin User**
- Items
  - index.php
    - SELECT FROM categories
    - SELECT…WHERE categories

- - - SELECT FROM items
      - retrieves category ID
  - viewItems.php
    - list of categories
    - table of items
    - passes item ID and category ID values as parameters
  - updateItemForm.php
    - SELECT…WHERE items
    - SELECT FROM categories
    - retrieves item ID and category ID parameter values
    - passes item ID as parameter
  - updateItem.php
    - UPDATE…WHERE items
    - fetches & validates inputs
      - not null/false/negative
  - addItemsForm.php
    - SELECT FROM categories
  - addItems.php
    - SELECT COUNT items
    - INSERT INTO items
    - fetches & validates inputs:
      - not null/false/negative
      - unique item code

- Orders
  - index.php
    - SELECT FROM orders
    - table of orders
    - passes order ID as parameter
  - addLineForm.php
    - SELECT…WHERE items
    - SELECT…WHERE orderItems
    - table of order line items
    - retrieves order ID parameter
    - passes order ID and user ID values as parameters
  - addLine.php
    - SELECT…WHERE items
    - INSERT INTO orderItems
    - fetches & validates inputs:
      - not null/false/negative
    - calculates discount & item cost based on quantity entered

- Profile
  - index.php
    - SELECT FROM users

- table of users
- passes user ID as parameter
- o addUserForm.php
    - Uses post method
- o addUser.php
    - SELECT COUNT users
    - INSERT INTO users
    - Password gets hashed
    - Uses post method
    - fetches & validates inputs:
        - not null/false
        - email must be unique
- o updateUserForm.php
    - SELECT…WHERE users
    - retrieves user ID parameter
- o updateUser.php
    - UPDATE…WHERE users
    - fetches & validates inputs:
        - not null/false

******* USER TYPE: REGISTERED *******

C. **Registered User**
- ➢ Items
    - o index.php
        - SELECT FROM categories
        - SELECT…WHERE items
        - SELECT…WHERE orderItems
        - declares item and category IDs
        - error message verification:
            - not null/false
    - o viewItems.php
        - dropdown list of categories
        - table of items of categories
            - passes category ID and item ID as parameters
        - details of item selected
            - passes item ID, item price, discount sale, and item name as parameters
    - o viewCart.php
        - Uses session to store cart
        - displays table of items added
    - o addToCart.php
        - establishes the session
        - select an array row for orderItems

- insert row into cart
  - o emptyCart.php
    - disconnects the session and empties the array

- ➢ Orders
  - o index.php
    - SELECT…WHERE orders
    - table of orders
      - only shows orders placed by the user
    - passes order ID as a parameter
  - o addOrderForm.php
    - SELECT FROM orders
    - SELECT FROM users
    - uses the session user id
    - uses post method
  - o addOrder.php
    - INSERT INTO orders
    - fetches and validates inputs:
      - not null/false
  - o addOrderLine.php
    - SELECT…WHERE items
    - SELECT…WHERE orderItems
    - table of items inside the selected order
    - uses post method
  - o addLine.php
    - SELECT…WHERE items
    - INSERT INTO orderItems
    - fetches and validates inputs:
      - not null/false/negative

- ➢ Profile
  - o index.php
    - SELECT…WHERE users
    - Session user set as user ID
    - passes user ID as parameter
  - o updateUserForm.php
    - SELECT…WHERE users
    - filters & validates inputs:
      - cannot be null
    - passes user ID as parameter
  - o updateUser.php
    - UPDATE…WHERE users
    - filters & validates inputs:
      - not null/false

******* USER TYPE: GUEST *******

D. **Guest User**
- ➢ index.php
  - o stores guest session
- ➢ Items
  - o index.php
    - ▪ SELECT FROM categories
    - ▪ SELECT…WHERE items
    - ▪ SELECT…WHERE orderItems
    - ▪ declares item and category IDs
    - ▪ error message verification:
      - • not null/false
  - o viewItems.php
    - ▪ dropdown list of categories
    - ▪ table of items of categories
      - • passes category ID and item ID as parameters
    - ▪ details of item selected
      - • passes item ID, item price, discount sale, and item name as parameters
  - o viewCart.php
    - ▪ uses session to store cart values
    - ▪ displays table of items added
    - ▪ calculates order total
  - o addToCart.php
    - ▪ establishes the session
    - ▪ select an array row for orderItems
    - ▪ insert row into cart
  - o emptyCart.php
    - ▪ empties the session array
  - o addOrderForm.php
    - ▪ SELECT FROM orders
    - ▪ drop down list
    - ▪ passes order ID as parameter
    - ▪ uses post method
  - o addOrder.php
    - ▪ INSERT INTO orders
    - ▪ filters and validates input
      - • not null/false/negative
    - ▪ uses post method
  - o confirmation.php
    - ▪ confirms the order went through
    - ▪ provides the order reference number
